Super Critical Fluid Extraction (SCFE) : Super Process | Suprior Product

- Superior to conventional technology of extraction.
- Natural extracts for food and Pharmaceutical products.
- 100% safe for use in Human consumption products.
- Preserves full profile of raw spice with freshness, aroma & characteristics as good as natural.
- No Residual solvent and no added characteristics.
- Contamination free extracts.
- No loss of back notes, high-low notes crucial for flavor and aroma.
- No loss of heat sensitive flavoring and aromatic active compounds.
- Better & long shelf life.
- No environmental hazard.
- Selective extraction as per customer demand.

About SCFE Technology

SCFE CO₂ is the green technology in field of extraction. Contrast to traditional extraction process , SCFE CO₂ extraction process is free from use of any solvents. Co₂ is itself is an inert, odorless and environment friendly media and listed as Generally Regarded As safe (GRAS) as it leaves no traces in the product. Co₂ extracted Oleoresin retains the true profile of Spice and no modified characteristic. The flavor, color, aroma, and characteristic of the extracts are as good as its natural spice.

SCFE CO₂ is the best clean & Green technology to meet the requirements for natural products when it comes to field of spice ingredients. Co₂ extraction are best known for recovering heat sensitive an, Top notes essence. Co₂ extracts are ??

As Natural as Nature made it to be.

Certification & Accreditation

- OHSAS
- MUI HALAL
- HACCP
- FSSAI
- Kosher (KLBD UK)
- Spice Board Certificate
- Organic Npop, Nop, Eu
- ISO 22000:2005
- ISO 9001:2015
- ISO 14001:2015
